

Complete each problem. You may use a calculator to help.

Part 1: Use the ratio table for the given problem. Be sure to fill in at least 4 sections and write your final answer in the blank.

1) Martin can read 4 pages in 7 minutes. At this rate, how long will it take him to read 9 pages?

2) The snack bar at the soccer field is charging \$12.00 for 9 hamburgers. At that rate, how many hamburgers could you get for \$20.00

Part 2: Determine the unit rate for each. (show work)

3) Alethia ran 24 miles in 3 hours. What is her average speed in miles per hour?
